DETAILED ACTION
Request for Continued Examination

Response to Amendment B

The cancellation of claims 49 and 50 are acknowledged.

Applicants' arguments, filed 08 April 2002, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 40-43, 45 and 51 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 40 is vague and indefinite due to the lack of clarity of the claim language "plurality of different cell lines" in line 2. Different cell lines can imply different types of cell lines or simply one type of cell line but not necessarily different genetic make-up or content. It is unclear as to what are the metes and bounds of the parameters that define "different". Claims 41-43, 45 and 51 are also indefinite due to their dependency from claim 40.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1631

Claims 40-43, 45 and 51, as necessitated by amendment, are rejected under 35

U.S.C. 102(b) as being anticipated by Giuliano et al (*J. of Biom. Screening*, 1997).

This rejection is maintained with respect to claims 41-43, 45 and 51 for reasons of record and newly applied to the amended claim 40. Applicant argues that Giuliano et al does not teach the combination of "data from a plurality of cell lines for multivariate analysis or classification of drug processes" (amendment B, pp 3-4, bridging line). However the combination of data as such are not within the claims. If applicants intended the argued combining data to be based upon the concept that the claim now reads on a plurality of different cell lines in claim 40, line 2; there does not appear to be any combining of data from the various cell lines to support the argument. If applicants intended the combining data step is referring to the morphological value being "any combination of" (line 14) various cellular components; the argument is non-persuasive because the components are not from the different cell lines or even different cells. The components are indicated to be selected from the same cell: "said morphological value is derived from a first component of a cell **and a second component of said cell**" (lines 13-14).

The prior art of record demonstrates the added limitation on page 256 (2nd column, lines 1-2). Giuliano et al carries out the ArrayScanTM System upon a plurality of different cell lines in assaying the two cell lines, SNG-19 and L929. Thus Giuliano et al anticipates the different cell lines of claim 40.

Therefore, the arguments are non-persuasive to overcome the rejection.

Conclusion

No claim is allowed.
